PRESS RELEASE

**Modern design and advanced technology
tell the new Levante shower enclosure by Arbi Arredobagno**

With the aim of offering a complete and coordinated proposal, **Arbi Arredobagno** - a solid and successful company present on the market for 35 years - **joins the furniture collections with the Ibra Showers program**, which includes **shower enclosures, shower trays, bathtubs, heating appliances and accessories.**

In the shower enclosure, the company **presents the new Levante model**, designed for those who appreciate the combination of elegance and functionality, thanks to the perfect fusion of contemporary design and advanced technology. Every detail is, in fact, designed to offer a shower experience of well-being and comfort.

The **sliding doors with 6 mm glass** are equipped with the **soft-close system** that ensures a slow and silent closing movement; **they are also easily removable** for easier cleaning; and **the standard handle, integrated into the aluminium profile**, emphasises style and practicality. **Transparent PVC drip-catching profiles** ensure a dry and clean environment, avoiding unpleasant water leaks.

The **standard height of 200 cm** allows to the Levante shower enclosure to be perfectly integrated into any space, giving the bathroom an airy and modern look. The sober and refined aesthetic is also guaranteed by the **reduced thickness of the profiles of only 30 mm and by the angular crossbar detail** that ensures an optimal connection.

An additional strength is the **advanced sliding system**, which integrates small bearings (19 mm) for more precise door adjustment, correcting any misalignments during installation.

The minimal and refined design of Levante is also expressed in the **presence of a special seal inside the profiles** that allows the installation of the glass without the use of silicone, with consequent benefits in terms of aesthetics but also in terms of hygiene and cleanliness. **The vertical profiles with screw caps flush with the profile** add a touch of discreet elegance.

The different **possible configurations** - corner or niche - also available in **non standard solutions**, offer flexibility and customization to meet every stylistic, functional and architectural need, harmoniously adapting to the different furniture choices. Arbi presents a wide range of colour options: from the classic **Brill and Black**, to the **“Ossidati” Special colours, in Oro, Copper, Rame, Inox and Antracite spazzolato**, up to **56 colour variants between matt and metal lacquers.**

Multiple alternatives also regarding **the choice of glasses, proposed in Trasparente, Grigio Europa, Satinato, Bronzo finish and serigraphies.**

Combining Arbi bathroom furniture with Ibra Showers proposals, the customer has the possibility to choose a custom-made solution, completely coordinated, creating a bathroom where comfort and elegance coexist harmoniously. The extraordinary ability of the company to work out of measure allows to create projects at the service of stylistic beauty and functionality, satisfying every need for space and aesthetic taste. Aesthetics, attention to detail and high quality standards are the values that have always guided Arbi in proposing an innovative and totally made in Italy design. Estetica, attenzione al dettaglio ed elevati standard di qualità sono i valori che da sempre guidano Arbi nel proporre un design innovativo e totalmente made in Italy.
